

XSITE® EASY

Xsite® EASY excavator guidance system removes the need for manual grade checking and jumping on-and-off the machine!

WHY TO SELECT » UPGRADE THE WAY YOU OPERATE

1. AVOID OVER AND UNDERCUTS

With Xsite® EASY, you'll always know exactly how much to cut or fill. Material and transportation costs decrease as extra materials are no longer needed.

2. INCREASE SAFETY ON SITE

Xsite® system's proximity alarm can be used for warning the operator when he is getting too close to existing structures or a powerline, for example.

3. INCREASE PRODUCTIVITY

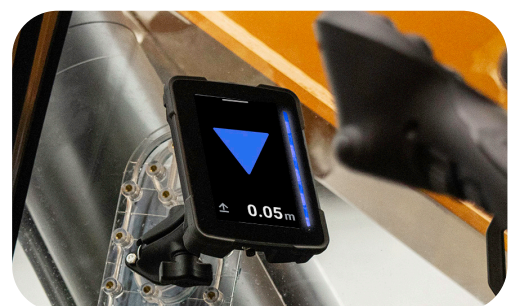

Xsite® EASY guides the machine operator in attaining the target plane quickly and easily. When the job is carried out properly the first time, you can save time and money.

4. MAINTAIN HEIGHT REFERENCE

When the excavator is moved on site, maintaining the correct height reference is easy thanks to the jobsite laser support.

Now with a new compass feature!

Xsite® EASY systems can be upgraded with the compass as a software update including the full sensor package.

EASY TO USE INTERFACE

Select/Change Bucket
Select the bucket in use.

Bucket visualization
See your buckets position in real-time in relevance to the target level.

Current Target Level
Depth/slope value that has been set by the operator.

Laser Receiver On/Off
Activate/deactivate the laser receiver.

Cut/Fill LED-indicator
Quick glance LED-lightbar that indicates your distance to the target level.

Compass Feature On/Off (optional)
Activate/deactivate the compass feature.

Select measuring point
Select corners or the center of the bucket to be the measuring point

Reset reference point
Reset the measuring values of the system

Home view Set Target Measuring Access Menu

XSITE® EASY - FEATURES

Compass functionality (optional)

With the compass, the Xsite EASY can be used where 3D positioning is not required, ranging from simple leveling to complex two-directional slope work.

Tiltrotator support

Take care of a wide range of tasks with onboard tiltrotator support.

Measure Slopes

Dig slopes towards and away from the cabin with ease and precision.

Store Multiple Buckets

Store all your buckets for quick and simple changing depending on the task at hand.

Use a Laser Reference

Maximize your productivity and performance with rotating jobsite laser support.

Set Warning Levels

Work safely near power lines and other objects at the work site. Xsite EASY warns you when you are getting too close to danger.

Light and dark theme

Ensure screen readability in all environment conditions by changing the color theme of the system.

Height and Distance Display

Real-time indication of bucket position with respect to a reference point.
